

Water for All: Conserve, Value, Enjoy

1. Positions of water mains and boundary lines of water catchment indicated on plan are approximate.
2. Contractors are to carry out pipe detection work and trial holes dug prior to commencement of earthworks to ascertain the actual alignment of water mains.
3. Steps must be taken to prevent damage to existing water mains. Contractors are liable for damage to PUB water mains.
4. Please call PUB Water And Operations Center (WSOC) at 62824344 should you encounter difficulties in locating the water mains. WSOC is to be informed immediately, should you encounter a leak on our water mains in the course of your work.

Type Of Water Mains

PUB Water Mains	NW - Dia
NEWater Mains	IW - Dia
Industrial Water Mains	RW - Dia
Raw Water Mains	RW - Dia
